Experience

AnyDesk Software GmbH, Stuttgart | Software Developer

08/2021 - present

- **Solve complex technical problems**, e.g. stabilised screen capture on Android remote client by investigating root causes of crashes and applying creative solutions like AOSP code analysis and reverse-engineering.
- Automated Java/C++ `enum` synchronisation by implementing a build-time parser/generator in C++. **Reduced run-time errors by 10% and development time by 10%.**
- **Demonstrate self-sufficiency and strong communication** within agile, cross-functional teams by implementing complete features on Android in Java (e.g. file manager) within deadlines despite minimal prior documentation.
- Improve Java code quality by automating unit testing with JUnit and Mockito. **Achieved high first-pass approval rates for pull requests and robust performance** across wide range of Android devices.
- Grew in experience and domain knowledge to contribute to **team leadership via regular code reviews** and sharing responsibilities of line manager.
- **Proactively stay up-to-date** with Android development trends and expand technical skillset by optimising cross-platform UX, e.g. for touch injection on iOS in Objective-C.

Hearing Diagnostics Ltd, Edinburgh | Software Developer

03/2020 - 06/2021

- Linux development in C++17, focussing on UI development with Qt and efficient data serialisation with *FlatBuffers*. Work featured in demos that **secured £715,000 in start-up funding**.

IntiQuan GmbH, Basel | Modelling & Simulation Analyst

07/2018 - 09/2018

- Automated workflow in R for **time savings during statistical analysis** and medical data simulation.

Open-Source Projects

Narradir | Android

- Automated board-game narration in Kotlin. The app has 20 thousand+ downloads on Google Play.

Bouldering Log | Android

- Developed native workout tracker app with Jetpack Compose, *Hilt*, Kotlin Flow, and coroutines in MWM architecture.

Education

ETH Zürich | M.Sc. Computational Biology and Bioinformatics

09/2016 - 08/2019

Imperial College London | B.Sc. Biotechnology

09/2013 - 06/2016

Skills and Interests

Programming langs.	Java • Kotlin • C++ • Bash • Objective-C • Swift • SQL • Python • XML • HTML • CSS • JavaScript
Android	Jetpack Compose • Android SDK • Android NDK • AIDL • Gradle • Espresso • JUnit • Mockito
Frameworks & Tools	Git • Jenkins • UIKit • SwiftUI • Jekyll • Qt • CMake
Project Management	Kanban • Jira • Confluence
Graphic Design	Inkscape • Gimp • Material Design
Languages	English (native) • German (Goethe-Zertifikat C1) • Mandarin (good) • Dutch (basic)
Hobbies	social-deduction board games • cycling • bouldering • acoustic guitar
